Yuhan USA Corporation was established in January 2018 as a wholly-owned subsidiary of Yuhan Corporation, Korea's largest pharmaceutical company with a 95-year heritage.

As an outpost of Yuhan's globalization strategy, Yuhan USA is searching for business development and collaboration opportunities in new drug assets and companies that share our drive towards excellence in medicine.

Business Development Manager will have the responsibility of exploring the new business opportunities and in-licensing novel assets that align with Yuhan USA's focused therapeutic areas.

Responsibilities:

- Build relationships with potential business partners, outside counsel, and other key external parties
- Attend conferences, seminars, meetings, and industry events as a representative of Yuhan USA
- Act as a liaison between external partners and internal R&D team; facilitate meetings in regards to product development, R&D collaboration, and other issues
- Perform research and analysis for focused therapeutic areas; report to the management and R&D department

Qualifications:

- Required
 - MS in Life Sciences, Pharmacy, Biology, or related discipline
 - Relevant biotech or pharmaceutical industry experience
 - Fluent in English
 - Excellent interpersonal, networking, and communication skills
- Preferred
 - MBA, Ph.D., or other advanced degrees
 - Experiences in drug research, development, and commercialization activities
 - Fluent in Korean
